

Lean Practitioner Training

Operational Excellence Training

Course overview

This Lean Practitioner classroom course will provide you with the skills to understand and communicate the benefits of Lean and use the correct tools to identify and solve business problems. The course will begin by covering the basics of Lean before moving on to more advanced techniques.

Led by experienced Lean Masters, the course is delivered through blended learning techniques that combine the best of traditional and innovative teaching to achieve the greatest learning outcomes. Alongside the classroom sessions, your training will be supported with access to additional online material, including our online Lean Practitioner course.

On successful completion of the course exam and submission of a Lean project, you will become a certified Lean Practitioner. To encourage ongoing success after certification, we also provide you with access to our eLearning materials for six months. In this period, you can email your own dedicated Lean Master for guidance. You will also benefit from access to our lifetime support.

Lean Practitioner Training

Delegate Feedback

"The trainer delivered the course material in a professional manner, using examples and experience to help understanding of the different elements of the course."

"An excellent experience from initial enquiry through to course delivery."

"This course has changed how I think about business and process. The course gives the benefit of experience from a very qualified and approachable trainer. Lots of content, lots of tools that can be applied immediately."

Course content and objectives

Lean Practitioner training covers the following:

- How to identify and eliminate waste and non-value-added activity from processes
- The Lean tools and the 5 principles of Lean
- The Toyota Production System and the 14 principles of the Toyota Way
- Process mapping techniques including Value Stream Mapping
- Establishing flow
- What an A3 is and how to use it
- How to inspire employees and create a culture of interdepartmental engagement
- Making real improvements in efficiency and quality
- Boosting customer satisfaction and stakeholder confidence

What's in it for me?

Lean methodologies provide significant savings for industries across the world. Becoming a Lean Practitioner, or training an employee to become one, is therefore hugely beneficial to you and your organisation.

As a Lean Practitioner, you will be able to implement Lean successfully in any business. Following this course, you'll be able to develop a Lean initiative in your workplace and run successful Kaizen events. You will identify and solve problems to increase efficiency and save money. Not only will this provide financial benefits, but will also promote a positive culture of change within your company.

For more help and guidance on the right training course for you, just get in touch.
