# Online Lean Six Sigma Black Belt Upgrade Training

**Quality - Support - Innovation**

This Lean Six Sigma Black Belt Upgrade training course is designed for those who have already trained to Green Belt level but would like to become a certified Black Belt. Please note that only those who can prove they have been adequately trained to Green Belt level are eligible for this course.

Picking up from where your Green Belt training left off, the Black Belt upgrade will provide you with the valuable soft skills and technical ability you need to solve complicated and strategically important issues in your workplace.

We follow the industry best practice certification process.

It ensures you have understood Lean Six Sigma at Black Belt level and have successfully completed a minimum of two projects. If adequate, one of the projects can be the one you previously completed as a Green Belt.

To ensure your success, the course comes with two hours of one-to-one coaching with a dedicated Master Black Belt and unlimited, lifetime support.

On completion of the Lean Six Sigma Black Belt Upgrade, you'll be confident in your ability to run and manage complex, cross-functional problems and ensure they don't return.

Fully optimised

Six months' access

Two hours' one-to-one coaching

Unlimited, lifetime support

90 CPD points

# Online Lean Six Sigma Black Belt Upgrade Training

In order to take this course you must prove you've been adequately trained as a Green Belt.

If you've taken your Green Belt training with us, all you need to do is apply and we'll get you

enrolled for your Black Belt Upgrade as soon as possible. However, if you've trained with another provider we'll need to see proof of training and your completed project work.

If you did not complete your Green Belt through 100% Effective, you may need to submit two projects, so allow enough time for that.

## Benefits

Our research has shown that the average Black Belt project delivers a return on investment (including the cost of training and development) of seven-to-one, compared with five-to-one for Green Belt projects. For this reason, an experienced Black Belt can earn upwards of £70,000.

Following completion of the Lean Six Sigma Black Belt Upgrade you will be able to:

- Use DMAIC and Lean Six Sigma across any function to improve a business
- Use data to identify the root causes of

problems

- Apply Lean Six Sigma principles, tools and techniques and explain the concepts to others
- Lead improvement teams to solve complicated and strategically important problems
- Understand and implement change in an organisation
- Successfully collect and use Voice of the Customer data
- Collect and analyse data correctly to support informed decision-making
- Develop and implement solutions, using advanced methodologies, to ensure problems are

solved permanently

- Certify as a Lean Six Sigma Black Belt to enhance your professional status

The 100% Effective best practice approach to certification is more than enough to be considered certified by future employers and practitioners. However, as this is an IASSC Certified Black Belt™ 100% Effective delegates can sit the IASSC exam through us for an additional cost if they wish to get their qualification endorsed by a third-party certification body.

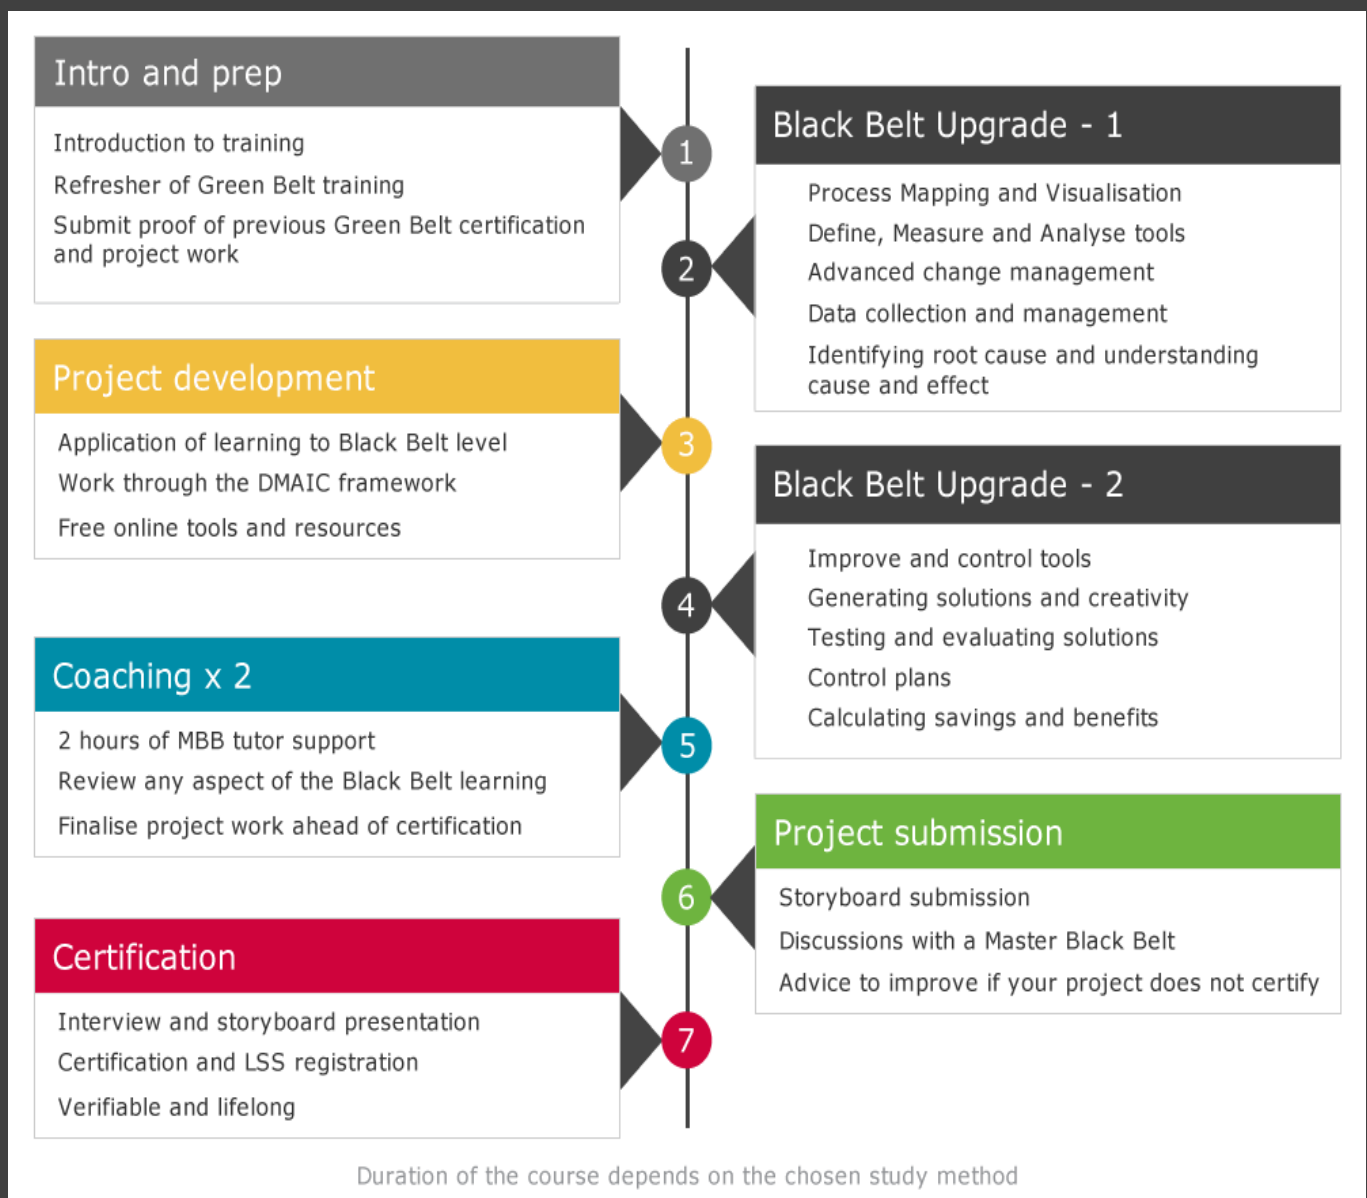

# Overview

Successful Lean Six Sigma Black Belts need to combine technical ability with the social skills required to influence and drive meaningful change. The training covers the DMAIC-based framework and also covers the necessary soft skills to ensure you are successful in the role.

As you've already completed the training required to achieve

Green Belt certification, the Lean Six Sigma Black Belt Upgrade picks up where you left off. You'll learn the advanced tools and techniques for more complex problems and enhance your soft skills to influence well at all levels.

By completing the Black Belt Upgrade you'll get 90 internationally recognised CPD points.

100% Effective's online Black Belt Upgrade training has a high customer satisfaction rating, with an average score of 4.8 stars out of 5.

# Prerequisites

You must be trained to Green Belt level and we ask all delegates to refresh their memory of the key tools and techniques before the course.

As this is an English language course, you should be proficient in English to business standard or you may struggle with some of the terminology.

## Is it for me?

Black Belt Upgrade training is designed for professionals who have already taken Green Belt training.

You should have senior responsibility for change management projects or intend to take responsibility for them in a new role.
