Online Mistake Proofing Training Course

Quality - Support - Innovation

Whether you're addressing complicated company processes at work or everyday routines at home, mistake proofing is invaluable. Known as Poka Yoke in Japanese, the Lean technique reduces the risk of simple mistakes and avoids costly slip-ups.

On this Mistake Proofing training course you will learn all about the technique as well as developing your own critical eye for identifying opportunities for mistake proofing. On completion, you will be confident in your ability to protect your processes, foolproof systems and significantly reduce risks.

This online course is packed with all the tools and techniques you need to start mistake proofing straight away. Designed and developed by our in-house Master Black Belts and eLearning experts, the course consists of a range of interactive educational material. It is optimised for all devices and can be accessed and revisited at a time and pace that suits your learning style.

With one month's access you will have plenty of time to make the most of the content. This course comes with lifetime support and is accompanied by a British English voiceover. On completion you will be awarded one CPD point and a certificate that is recognised internationally.

100% Effective's online Mistake Proofing training has a high customer satisfaction rating, with an average score of 5 stars out of 5.

Benefits

From your personal to your professional life, your new eye for improvement opportunities and your practical approach to problems will prove invaluable.

On completion of this course, you will be able to:

- Identify and implement mistake proofing opportunities
- Communicate the benefits of Poka Yoke to others
- Foolproof systems: save time and money on inductions/training
- Protect processes and reduce risks
- Standardise procedures
- Increase quality levels of a process

Course Content

Giving you a wealth of knowledge and a range of Poka Yoke tools, you will be well-equipped to make immediate improvements to your organisation.

During this course, you will learn:

- To define Poka Yoke and its benefits
- The benefits of prevention over inspection
- The cost of poor quality and mistakes
- Common causes of defects and how to identify them
- The different types and levels of mistake proofing
- How to implement and promote mistake proofing

Is it for me?

Whether in our personal or professional lives, we can all benefit from learning to foolproof systems and so this training course can be taken by anyone with an interest in the Lean technique.

There are no prerequisites for taking our Mistake Proofing course.
