

Minitab Training

Operational Excellence Training

Course overview

Minitab is a software package used to analyse data in Business Improvement initiatives. It can solve complex calculations and is essential for Lean Six Sigma and Six Sigma projects. Our Minitab training is led by Master Black Belts with extensive experience using the software for projects in industries around the world.

We offer a short Introduction classroom course or a longer Advanced classroom course. Our Introduction to Minitab training will give you practical experience using Minitab to work out complex calculations, by inputting your own project data into the software. Through this you will not only be able to confidently use the software, but you will have a real understanding of the benefits of Minitab. Our Advanced course offers comprehensive Minitab training so you'll be able to use its full functionality and get the most out of the software.

Both courses conclude with a multiple-choice exam which can be taken several times and, to make sure you continue to achieve success with Minitab, we also offer our lifetime support.

Minitab Training

Training objectives

Delegate Feedback

"Informative and stimulating."

"Will be a useful tool if applied properly."

"Learnt a lot in three days, excellent course delivery."

"I will definitely be recommending to colleagues and singing 100% Effective's praises to my management! A course well worth doing – thank you!"

Minitab deals with complicated equations and statistics that are vital to Lean and Lean Six Sigma projects, making it an essential tool for all Belts. High-quality Minitab training is an investment for both you and your company; once you have completed your course, you will be able to use the software in all future projects.

On completion of your Introduction to Minitab training you will:

- Understand and know how to use Minitab
- Have used the tool with real data
- Be able to produce statistical analysis from various types of data using Minitab
- Interpret the results from Minitab output

Advanced Minitab training will enable you to do all of the above, and also:

- Be able to use the software to produce statistical analysis from various types of data
- Understand the best tool to use for different kinds of data
- Understand how to use the graphics and report writing part of the package
- Get the most out of Minitab

What's in it for me?

We offer internationally recognised Minitab training. These courses are vital for any Lean Six Sigma or Six Sigma students and are also beneficial for individuals managing projects in their workplace.

Both courses provide practical experience with Minitab to ensure you certify, confident with the specialist software. 100% Effective Minitab training is CPD approved and all delegates receive lifetime support.

Both Minitab training courses are CPD certified. The Introduction to Minitab training comes with 10 CPD points and the Advanced Minitab training comes with 15 CPD points.
